PROFILE SUMMARY

DevOps and Front-End Developer enthusiast with hands-on experience in React.js, Docker, AWS, and CI/CD pipelines. Skilled in building responsive web applications and serverless solutions.

EDUCATION

Bachelor of Computer Applications 2022– 2025

- Represented university in Technical Fest
- Top 5% in Academics

SKILLS

Technical skills: Python, SQL, Docker, Jenkins CI/CD, AWS,React JS

Tools & Platforms: Git, GitHub, Linux, Docker Compose, AWS EC2, S3, IAM, lamda,Jenkins Pipelines

PROJECTS

Two-Tier Web Application Deployment 2025-2026

- **Situation:** Needed a simple way to run a web application with a database without manual setup issues.

  Task: Deploy both services together in a consistent and repeatable manner.
- **Action:** Used **Docker Compose** to define application and database containers, configure networking, and manage service startup order.
- **Result:** Application ran reliably across environments with faster setup and fewer deployment errors.

Serverless Database with AWS Lambda

- Developed a **serverless database** using **AWS Lambda** and **DynamoDB** to manage data efficiently.
- Automated data processing without the need for servers, simplifying maintenance

AWS S3 Static Website Hosting 2025-2026

- Situation: Needed a cost-effective way to host a static website with reliable public access.
- Task: Deploy the website on AWS S3 with proper access controls and ensure it is publicly available.
- Action: Configured an S3 bucket for static website hosting, set up bucket policies for public access, and uploaded HTML/CSS files for deployment.
- Result: Successfully hosted a fully functional static website on AWS S3, accessible globally, with secure and scalable configuration.

ACHIEVEMENTS

- **Achieved a high score of 92/100 at Webathon, Omnitrics 2025, The National College.**
- Maintained a consistent academic performance with CGPA ranging between 9.0 and 10.0 across semesters.
- **Continuously learning and practicing new tools through real projects and self-study.**
